Course's Contribution To Program	No	Program Learning Outcomes	1	2	3	4	5		
	1	Adequate knowledge in mathematics, science and engineering subjects pertaining to the relevant discipline; ability to use theoretical and applied information in these areas to model and solve engineering problems.							
	2	Ability to identify, formulate, and solve complex engineering problems; ability to select and apply proper analysis and modeling methods for this purpose.							
	3	Ability to design a complex system, process, device or product under realistic constraints and conditions, in such a way as to meet the desired result; ability to apply modern design methods for this purpose.							
	4	Ability to devise, select, and use modern techniques and tools needed for engineering practice; ability to employ information technologies effectively.							
	5	Ability to design and conduct experiments, gather data, analyze and interpret results for investigating engineering problems.							
	6	Ability to work efficiently in intra-disciplinary teams.		X					
	7	Ability to work efficiently in multi-disciplinary teams;			X				
	8	Ability to work individually.			X				
	9	Ability to communicate effectively in Turkish/English, both orally and in writing; Ability to write effective reports and comprehend written reports, make effective presentations,			X				
	10	Prepare design and production reports, give and receive clear and intelligible instructions.							
	11	Recognition of the need for lifelong learning; ability to access information, to follow developments in science and	X						

		technology, and to continue to educate him/herself.					
	12	Awareness of professional and ethical responsibility.			X		
	13	Information about business life practices such as project management, risk management, and change management.					
	14	Information about awareness of entrepreneurship, innovation, and sustainable development.					
	15	Knowledge about contemporary issues and the global and societal effects of engineering practices on health, environment, and safety.					
	16	Knowledge about awareness of the legal consequences of engineering solutions.					X
	17	Knowledge on standards used in engineering practice.
