

The Future is Built Here!

PART - TIME OR FULL - TIME JUNIOR & SENIOR ELECTRONICS ENGINEERS

Would you like to be part of a high tech company, which develops technology for the world's best R&D Labs, companies and universities? We are looking for ambitious & experienced engineers and students to develop large area imaging systems with 400 cameras for military applications, Atomic Force Microscopes and low temperature measurement systems.

Please send your resume if you have experience in:

- Digital design expertise with FPGAs using VHDL.
- Experience in analog and digital hardware design.
- C, C++ knowledge.
- Prepared to work hard & independently in a dynamic and demanding environment.
- Experience in microcontrollers, RS232, GPIB, USB interface, ADC and DACs and designing systems involving them.

Employees will be working in our new office located at ODTÜ MET Teknokent.
