Course's Contribution To Program	No	Program Learning Outcomes		1	2	3	4	5
	1	Adequate knowledge in mathematics, science and engineering subjects pertaining to the relevant discipline; ability to use theoretical and applied information in these areas to model and solve engineering problems.		X				
	2	Ability to identify, formulate, and solve complex engineering problems; ability to select and apply proper analysis and modeling methods for this purpose.		X				
	3	Ability to design a complex system, process, device or product under realistic constraints and conditions, in such a way as to meet the desired result; ability to apply modern design methods for this purpose.		X				
	4	Ability to devise, select, and use modern techniques and tools needed for engineering practice; ability to employ information technologies effectively.		X				
	5	Ability to design and conduct experiments, gather data, analyze and interpret results for investigating engineering problems.		X				
	6	Ability to work efficiently in intra-disciplinary teams.				X		
	7	Ability to work efficiently in multi-disciplinary teams;			X			
	8	Ability to work individually.		X				
	9	Ability to communicate effectively in Turkish/English, both orally and in writing; Ability to write effective reports and comprehend written reports, make effective presentations,			X			
	10	prepare design and production reports, give and receive clear and intelligible instructions.		X				
	11	Recognition of the need for lifelong learning; ability to access information, to			X			

		follow developments in science and technology, and to continue to educate him/herself.					
	12	Awareness of professional and ethical responsibility.				X	
	13	Information about business life practices such as project management, risk management, and change management.			X		
	14	Information about awareness of entrepreneurship, innovation, and sustainable development.	X				
	15	Knowledge about contemporary issues and the global and societal effects of engineering practices on health, environment, and safety.	X				
	16	Knowledge about awareness of the legal consequences of engineering solutions.		X			
	17	Knowledge on standards used in engineering practice.	X
