| Course Title-Course Code: CE 554 THE DIRECT STIFFNESS METHOD FOR FRAME SYSTEMS |  |  |  |  | Name of the Programme:CIVIL ENGINEERING |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Semester | Teaching Methods |  |  |  |  |  |  | Credits |  |
|  | Lecture | Recite | Lab. | Field Study | H W | Other | Total | Credit | $\begin{aligned} & \text { CTS } \\ & \text { redit } \end{aligned}$ |
| 1-2 | 42 | 0 | 0 | 0 | 42 | 146 | 188 | 3 | 7.5 |
| Language | Turkish |  |  |  |  |  |  |  |  |
| Compulsory / Elective | Elective |  |  |  |  |  |  |  |  |
| Prerequisites | - |  |  |  |  |  |  |  |  |
| Course <br> Contents | Stiffness Definition and Stiffness matris, Local and global coordinate systems, coordinate transformations, elemental and global (structural) stiffness matrix with respect to the global coordinate system, Solution of stiffness equations, calculation steps of stiffness method, numerical examples, analysis of one dimentional bars, two dimensional trusses, beams, frames and grids. Three dimensional trusses, Three dimensional frames, additional topics in the stiffness method, elastic supports, inclined supports, hinges in beam and frame elements. Virtual work and the principle of minimum potential energy, brief introduction to the finite element method, |  |  |  |  |  |  |  |  |
| Course Objectives | To give the basic principles of The Direct Stiffness Method for Frame Systems |  |  |  |  |  |  |  |  |
| Learning Outcomes and Competences | Ganing the skill of handling and solving The Direct Stiffness Method for Frame Systems |  |  |  |  |  |  |  |  |
