This e-book presents an analysis on the correlative relations and interactions between democracy and education at macro and micro levels. This analysis demonstrates that democracy and educational institutes are influenced by the natural, demographic, institutional and cultural dimensions of their society and that the relation between them should be dealt with under the authentic conditions of the society and with an integral perspective. This e-book provides a sound base for discussions on democracy at all levels. Thus it contributes to functional discussions about the philosophy behind education and democracy, by helping education institutions, teachers, administrators and all responsible citizens to consider their own roles within a comprehensible and simple frame in society through the process of democratization.
