1. Course Description

COURSE DESCRIPTION FORM								
Course Code and Title	CHE328-1	CHE328- Liquid Crystal Dyes						
Course Semester	6							
Catalog Description (Content) of the Course		iquid crystal structures and classification. Usage areas of liquid crystals. roperties and structures of liquid crystal dyes. Production of finisheddye.						
Main Textbook	E. Lueder,	L,quidCrystal Displays, John Wiley&Sons, 2001, USA						
Supporting Textbooks	I.C. Khoo,	nal Liquid CrystalSociety (http://www.ilcsoc.org) Liquid Crystals, John Wiley&Sons, 1995, Canada et al. (Ed.), PhysicalProperties of Liquid Crystals, Wiley-VCH, 1999,						
Course Credit (ECTS)	3	•						
Prerequisites of the Course (Compulsory attendance should be indicated here.)	No	No						
Type of the Course	Elective							
Instruction Language of the Course	Turkish							
Object and Target of the Course	Examinatio	on of liquidcrystalsandtheirdyes, synthesisevaluation						
Learning Outcomes of the Course	Informing a	about liquid crystals and dyes						
Mode of Delivery								
	COURSE	E CONTENT						
	1. week	Introduction						
	2. week	Liquid crystalsandtheirclassification						
	3. week	Liquid crystalsandtheir classification						
	4. week	Coloranddyesyuffs						
	5. week	G-H Systems						
Weekly Schedule of the	6. week	G-H Systems						
Course Course	7. week	G-H Systems						
	8. week	Liquid crystal dyes and their properties						
	9. week	Liquid crystal dyes and their properties						
	10. week	Liquid crystal dyes and their properties						
	11. week	Effects on G-H type indicators						
	12. week	Effects on G-H type indicators						

	wee 14.	13. week 14. Productionofdyeswhichhavedifferentstructures							
Educative Activities (Credit will be determined based on the time given for these activities. Should be filled carefully.)	Mid	oretical Study Hours of Term and Studying f al and Studying for Fi	for Mid-Term	Week					
			Quantity	Total Contribu					
	1	14	2	(%)					
		dterm mework	0	0					
		signment	0	0					
		ojects	0	0					
		nctice	0	0					
Assessment Criteria	Qu	iz	0	0					
	ter	Contribution of Interm Studies to Overall Grade		60					
	Co Ex	ontribution of Final amination to erall Grade		40					
	Att	tendance							
		Activit	Total Week Count	Weekly Duration (in hour)	Total Workload in Semester				
		Theoretical Study H Per Week		14	3	42			
		Practicing Hours of Week Reading							
		Searching in Interne	et and Library						
		Designing and Appl Materials							
Workload of the Course		Preparing Reports							
		Preparing Presentation							
		Presentation			1				
		Mid-Term and Stud	2	10	20				
		Final and Studying	1	12	12				
		Other		1	0				
		Total work load				74			
			+	+					
		Total work load/25				2.96			

		Number	Program Outcomes	1	2	3	4	5	
		number	Program Outcomes Adequate	1		3	4	J	
			•						
			knowledge in mathematics,						
			•						
			engineering						
			subjects pertaining to the						
			relevant						
		1	discipline; ability	X					
			to use theoretical						
			and applied						
			information in						
			these areas to						
			model and solve						
			engineering						
			problems.						
			Ability to identify,						
			formulate, and						
			solve complex						
			engineering						
			problems; ability						
		2	to select and	х					
			apply proper						
			analysis and						
			modeling						
			methods for this						
			purpose.						
Committee Contaction To			Ability to design a						
Course's Contribution To			complex system,						
Program			process, device						
			or product under						
			realistic						
		3	constraints and conditions. in						
		3	conditions, in such a way as to	X					
			meet the desired						
			result; ability to						
			apply modern						
			design methods						
			for this purpose.						
			Ability to devise,						
			select, and use						
			modern						
			techniques and						
			tools needed for						
		4	engineering	X					
			practice; ability to						
			employ						
			information						
			technologies						
			effectively.						
			Ability to design						
			and conduct						
			experiments,						
		5	gather data, analyze and	X					
			analyze and interpret results						
			for investigating						
			engineering						
			Griginocring	<u> </u>					

	nrohlomo	1				T T
	problems.					
	Ability to work					
6	efficiently in intra-				X	
	disciplinary				Λ	
	teams.					
	Ability to work			\top		
7	efficiently in					
/	multi-disciplinary	X				
	teams;	Ī				
	Ability to work			1		
8	individually.				X	
	Ability to		\vdash	\dashv		
	communicate	Ī				
	effectively in	Ī				
	Turkish/English,					
	both orally and in					
	writing: Ability to	Ī				
9	writing; Ability to	Ī			X	
	write effective					
	reports and	Ī				
	comprehend					
	written reports,	Ī				
	make effective					
	presentations,		Щ			
	prepare design					
	and production					
10	reports, give and	X				
	receive clear and	Λ.				
	intelligible	Ī				
	instructions.					
	Recognition of		ΙŢ			
	the need for					
	lifelong learning;	Ī				
	ability to access	Ī				
	information, to	Ī				
11	follow					
11	developments in	Ī			X	
	science and					
	technology, and					
	to continue to					
	educate					
	him/herself.					
	Awareness of		H	\dashv		
10	professional and					
12	ethical		X			
	responsibility.					
-	Information about	l -	\forall	\dashv		
ı	business life					
		l				
						i I
	practices such as					
13	practices such as project	v				
13	practices such as project management,	x				
13	practices such as project management, risk	х				
13	practices such as project management, risk management,	X				
13	practices such as project management, risk management, and change	X				
13	practices such as project management, risk management, and change management.					
13	practices such as project management, risk management, and change management. Information about					
13	practices such as project management, risk management, and change management. Information about awareness of					
	practices such as project management, risk management, and change management. Information about awareness of entrepreneurship,		x			
13	practices such as project management, risk management, and change management. Information about awareness of entrepreneurship, innovation, and		x			
	practices such as project management, risk management, and change management. Information about awareness of entrepreneurship,		x			

	15	Knowledge about contemporary issues and the global and societal effects of engineering practices on health, environment, and safety.		X					
	16	Knowledge about awareness of the legal consequences of engineering solutions.	X						
	17	Knowledge on standards used in engineering practice.	x
