

CHEM 152 GENERAL CHEMISTRY LABORATORY

- 1) Remaining 6 experiments (exp 5: Freezing Point Depression; exp 6: Effect of Temperature on Reaction Rate; exp 7: Chemical Equilibrium ; exp 8: Titration; exp 9: pH and indicators; exp 10: Redox Reactions) will be carried out via distance learning by using Perculus System.
- 2) Before each experiment 2 questions will be asked as quiz exam and you will upload your answer sheet to the Perculus as ödev
- 3) We will tell and show you the experimental procedure by using the uploaded video
- 4) After video is finished we will give you the related data of the experiment and you will do the calculations, put your comments and upload it as ödev.
- 5) For the make-up of the first 4 experiments we will upload their experimental videos to the Perculus system, you will watch the videos and learn the experiments and will be responsible from these experiments for the final exam.
- 6) Chem 152 lectures will start on Tuesday 23 June 2020 at 12:00 a.m.
